Materials science in semiconductor processing

Endnote offers more than 6,000 bibliographic styles all Clarivate Analytics websites use cookies to improve your online experience. They have been entered on your computer when you launched this website. You can change cookie settings through your browser.Ok to ContinueCookie Policymanage Consent Download Guide to authors in PDF format Science of semiconductor materials, provides a unique forum for discussing the transformation novel, applications and theoretical studies of functional materials and devices for (opto) electronics, sensors, detectors, biotechnology and green energy. Each issue will have the purpose of providing a snapshot of current intuitions, new achievements, innovations and future trends in different fields such as microelectronics, energy conversion and storage, communications, biotechnology, (photo) of catalysis, of the Nanotechnologies and thin film technology, hybrids and composite materials, chemical treatment, steam-phase deposition, device manufacture, and modeling, which are the spine of advanced semiconductor treatment and applications.coverage will include: Advanced lithograph for submicron devices; Etching and related topics; Ionic implantation; damaging the evolution and related issues; plasma and thermal CVD; rapid heat treatment; advanced metallization and interconnection systems; Thin dielectric layers, oxidation; sol-gel treatment; chemical and (electro) chemical deposition; semiconductor transformation composed; New non-oxide materials and their applications; (Macro) molecular and hybrid materials; Molecular dynamics, ab-initio methods, Monte Carlo, etc.; new materials and processes for discreet and integrated circuits; magnetic materials and spintronic; Etherostructures and quantum devices; Engineering of electrical properties and semiconductor optics; crystal growth mechanisms; Reliability, density of defects, intrinsic and defects. Submit impurities Your manuscript Your Paper Your Way Now distinguish between the requirements for new and revised presentation. You can choose to send your manuscript as a single Word or PDF to use in the arbitration process. Only when the card is being reviewed, you will be asked to insert the card into a correct 'acceptance' format and provide the necessary elements for the publication of your article. I know more, visit the preparation section below . Science of semiconductor materials, provides a unique and much needed forum for the discussion of experimental materials and research theoretical stimulated by and applied the processing of semiconductors. Each number will have the purpose of providing a snapshot of current understanding, new achievements, discoveries and future trends in sectors such as ion implantation, diffusion and absorption, process and modeling equipment, metallization and interconnections, conditioning, etc., which are The backbone of the semiconductor device in progress. The coverage includes: advanced lithograph for submicron devices; Etching and related topics; Ionic implantation for doping engineering; damaging the evolution and related issues; plasma and thermal CVD; rapid heat treatment; ultra low energy implantation: physics, limitations and perspectives; Gettering procedures for ULSi; advanced metallization and interconnection systems; Thin dielectric layer, oxidation; Ulsi cleaning device procedures; semiconductor transformation composed; Physical processing modeling (Ionian implantation, metal deposition, oxidation, etching, etc.); molecular dynamics, ab-initio methods, Monte Carlo, etc.; New physical models in commercial simulation platforms for the design and modeling of advanced devices; equipment new materials and processes for discreet and integrated circuits; Etherostructures and quantum devices; Electrical and optical engineering semiconductor properties; Crystal growth; mechanisms, reliability, density of intrinsic impurity defects and defects. Types of paper Types of contributions: Original search documents, search Letter to the publisher: Original material: the presentation of an article implies that the described work has not been published previously (except in the form of an abstract or as part of a published lesson or academic thesis), which is not considered in consideration for publication elsewhere , that its publication is approved by all authors and who, if accepted, will not be published elsewhere in the same form, in English or in any other language, without the written consent of the publisher. Submission control List You can use this list to perform a final check of your presentation before sending it to the revision magazine. Please check the relevant section in this guide for authors for more details. Make sure the following items are present: an author has been designated as the corresponding author with the contact details: $\hat{A} \hat{e} \hat{a}, \sim \hat{e}$ e-mail address . Complete e-mail address All files needed were loaded: manuscript: $\hat{A} \hat{e} \hat{a}, \sim \hat{e}$ Include keywords figures (include relevant captions) $\hat{A} \hat{e} \hat{a}, \sim \hat{a} \hat{a} \hat{a} \hat{e}$ all tables (including titles, description, more page notes) $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Assume all quotes of figure and table in the text correspondence the files provided - clearly indicate if the color must be used for any figures in the abstract progress / highlights files (where applicable) additional files (where applicable) further considerations - the manuscript was 'spell controlled 'and' controlled grammar' All references mentioned in the reference list are mentioned in the text and vice versa ... The permission was obtained for the use of copyrighted material from other sources (including I NTERNET) $\hat{A} \hat{e} \hat{a}, \sim \hat{e}$ A Declaration of interest in competition is provided, even if the authors have no interests in competition to declare ... the policies of the detailed newspaper in this guide has been reviewed - suggestions for the referee And contact details provided, based on the requirements of the newspaper for more information, visit our service center. When sending the revised manuscript, make sure you charge the final version of the card. Please remove the old version (s) of the manuscript before sending the magazine version. Ethics in publication Please consult our ethics information in the publication. Competitor statement of interest All authors must disclose any financial and personal relationship with other people or organizations that could inappropriately influence (prejudice) their work. Examples of potential conflicts of interest include occupation, consultancy, stock owned, honorary, expert testimonials, patent applications / recordings and grants or other loans. The authors should complete the declaration of education of competitor using this model and load the sending system at the Attach / Load file step. Note: Please do not convert the .docx model to another type of file. The author's signatures are not required. If there are no interest to declare, please choose the first option in the model. More information. The presentation of the declaration and verification of the presentation of an article implies that the work described was not published previously (except in the form of an abstract, a published lesson or the academic thesis, consult the multiple, redundant or competitor publication " For more information), which is not considered for the publication elsewhere, that its publication is approved by all authors and tacitly or explicitly from the responsible authorities in which the work was carried out, and that, if accepted, not it will be published elsewhere in the same form, in English or in any other language, Electronically without the written consent of the copyright holder. To verify the originality, your article can be controlled by the control of the resemblance of the originality detection service. Preprint Note that preprints can be shared anywhere at any time, in line with the Elsevier sharing policy. Share your preprints eg. On a preprint server will not compare as a publication upon afterwards (consult the multiple publication, redundant or competitor "For more information). Language use included in the inclusive language inclusive Diversity, transmits compared to all people, is sensitive to differences and promotes equal opportunities. The content should not make assumptions about the convictions or commitments of any reader; They contain nothing that could imply that an individual is higher than another, on the lane of age, sex, race, ethnicity, culture, sexual orientation, disabilities or health conditions; And use an inclusive language everywhere. The authors should ensure that writing is free of prejudice, stereotypes, jargon, reference to the dominant culture beliefs / or cultural asseses. We recommend looking for genre neutrality using plural names (" clinical, patients / customers") as default / wherever you can avoid using "he, her" or "he / she / " It is advisable to avoid the use of descriptors that refer to personal attributes such as age, sex, race, ethnicity, culture, sexual orientation, disabilities or health conditions unless they are relevant and valid. These guidelines are intended as a reference point to help identify the appropriate language, but are not at all exhaustive or final. Author's contributions for transparency, we encourage authors to present a statement file by the author outlining their individual contributions to the Charter using the related credit roles: conceptualization; Curing data; Formal analysis; Financing acquisition; Investigation; Methodology; Project administration; Resources; Software; Supervision; Validation; Display; Roles / Writing - Original Draft; Writing - Review and modification. Authority statements should be formatted with the names of the authors of first and the next credit role. More details and an example Changes to authors of the authors should carefully consider the list and order of the authors before sending their manuscript and provide the definitive list of authors at the time of the original presentation. Any addition, cancellation or rearrangement of the author's names in the assuation list must be carried out only before the manuscript has been accepted and only if approved by the newspaper editor. To request this change, the editor must receive the following by the corresponding author: a) the reason for the modification of the author list and (b) written confirmation (e-mail, letter) from all authors who agree with Adding, removing or rearrangement. In the case of added or removal of the authors, this includes confirmation from the author that is added or removed. With regard to exceptional circumstances, the editor considers the addition, cancellation or rearrangement of the authors after the manuscript has been accepted. While the editor considers the request, the publication of the manuscript will be suspended. If the manuscript has already been published in an online problem, all requests approved by the editor will be in a corrigendum. Article transfer service This newspaper is part of our Article Transfer Service. This means that if the editor believes that your article is more suitable in one of our other participating magazines, then you will be asked to consider the transfer of the article to one of those. If you agree, your article will be automatically transferred to your account without reformatting. Please note that your article will be revised again by the new diary. More information. Copyright After the acceptance of an article, the authors will be invited to complete a newspaper publication agreement ("see more information about this). An e-mail will be sent to the corresponding author confirming the receipt of the manuscript together with a "diary publication agreement" module or a link to the online version of this agreement. iSBaskits can reproduce of content or prepare lists of articles that include abstract internal circulation within their institutions. The permission of the publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. If extracts from other copyrighted work are included, the author (s) must obtain permission written by copyright and credit owners In the article. Elsevier has the pre-printed forms for use of the authors in these cases. For the gold open access articles: after acceptance of an article, authors will be asked to complete a "License Agreement" (more information). The re-use third-party allowed open access articles of gold is determined by the author's choice of utente.Author license Rantas An author that you (or your employer or institution) have certain rights to reuse your work. More information. Elsevier supports responsible sharing Find out how to share your search published on Elsevier Journals. Role of the source of financing is required to identify those who have provided financial support for the conduct of research and / or the preparation of the article and to briefly describe the role of sponsors, if present, in the study project; in the collection, analysis and interpretation of the data; in writing the relationship; And in the decision to present the article for publication. If the source of financing did not have such involvement, this should be declared. Open access Please visit our Open access page for more information. Elsevier Research Academy Researcher Academy is a free sleahelbe designed to support early-career researchers and master their research trip. The environment "learn" the researcher Academy offers several interactive modules, webinars, guides and downloadable resources to guide you through the process of writing for the search and go through peer review. Feel free to use these free resources to improve your presentation and navigate with ease the publishing process. Language (use and editing services) Please write your text in English (American or British use is accepted, but not a mixture of these). The authors who hear their manuscript in English may require the change to eliminate possible grammatical or spelling errors and to comply with to correct scientific English might want to use the English language editing service available from Elsevier's Author Services. Submission Our online guide sending system gradually makes it through the process of entering the item details and upload your files. The system converts the articles files into a single PDF file used in the peer review process. Editable files (for example, latex) are required to compose your article for the final publication. All correspondence, including the notification of the decision and the requests of the audit editor, is sent via e-mail. Submit your article Please send your article via please send the names and institutional e-mail addresses of several potential arbitrators. For more details, visit our support site. Note that the editor retains the sole right to decide whether the suggested reviewers are used or not. The new submission request to this journal proceeds totally online and you will be guided step by step through the creation and uploading of your files. The system automatically converts the files to a single PDF file, which is used in the review process peer.as part of your Service Charter Your Way, you can choose to send the manuscript as a single file to be used in the reporting process. This can be a PDF or a Word document, in any format or layout that can be used by the referees to evaluate the manuscript. It should contain enough high quality figures for the arbitrator. If you prefer to do, you may still provide some or all of the source files at initial presentation. Please notice The largest individual figure files of 10 MB must be loaded separately. References There are no rigorous requirements for reference formatting to the presentation. Refereces can be in any style or size until the style is consistent. When applicable, author (s) name (i), magazine title / title of the book, title title / title of article, publication year, volume number / book Chapter and the article number or article number They must be present. The use of doi is highly encouraged. The reference style used by the Journal will be applied to the Article from Elsevier during the trial. Note that the missing data will be highlighted during the proof for the author of correct. Formatting Requirements There are no strict formatting requirements but all manuscripts must contain the essential elements needed to transmit your manuscript, for example abstract, keywords, introduction, materials and methods, results, conclusions, artwork and tables with captions.if your Article includes no video and / or other additional material, this should be included in your initial presentation for the review of peer purposes. It has the article into well-defined sections. The figures and tables embedded in the text Make sure the figures and tables included in the single file are placed next to the text in question in the manuscript, rather than at the bottom or upper part of the file. The corresponding entry must be positioned directly under the figure or table. Peer Review This magazine operates a single anonymous review process. All contributions will be initially evaluated by the editor for the fitness for the Journal. The documents considered suitable are therefore generally sent to a minimum of two auditors of experts to assess the scientific quality of the document. The publisher is responsible for the final decision regarding the acceptance or rejection of the articles. The editor's decision is final. Publishers are not involved in the decisions on documents that have written themselves or have been written by family or colleagues or who refer to products or services in which the editor has an interest. Any these presentation is subject to all the normal journal procedures, with the Peer review managed regardless of the relevant author and their research groups. More information on peer review types. Review Means The use of the text processing software regardless of the file format of the original presentation, to the review it is necessary to provide us with an editable file the entire article. Keep the text layout as simple as possible. Most formatting codes will be removed and replaced by the standard codes. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the guide to publication with Elsevier). See also the section on the electronic art work. To avoid unnecessary errors we strongly recommend using the "Spell-Check" and "Grammar-Check" functions of your word processor. LATEX It is advisable to use the last class Article Elsevier to prepare your manuscript and Bibtex to generate your bibliography our guidelines has all the details. Subdivision - numbered sections divide your item into well-defined and numbered sections. Subsections must be numbered 1.1 (then 1.1.1, 1.1.2, ...,), 1.2, etc. (Abstract is not included in the numbering of sections). Use this numbering even for internal use Cross references: not only refer to the text ' . Each subsection can be given a brief address book. Each title should appear on a separate line. Introduction State The objectives of the work and provide adequate preparation, avoiding a detailed revision of the literature or a summary of the results. Materials and methods provide sufficient details to allow the work to be reproduced by an independent researcher. The methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use the quotes and even mention the source. Any changes to existing methods should also be described. Experimental provide sufficient details to allow the work to be reproduced by an independent researcher. The methods that are already published should be summarized, and indicated by a reference. Self Directly from a previously published method, use the quotation marks and also mention the source. Any changes to existing methods should also be described. Theory / Calculation Section A theory should extend, do not repeat, the background for the article already addressed in the introduction and lay the foundations for Opera. On the contrary, a calculation section represents a practical development from a theoretical basis. The results of the results should be clear and concise. Discussion This should explore the meaning of work results, do not repeat them. A combined result and a section of discussion is often appropriate. Avoid spacious citizens and discussions on published literature. Conclusions The main conclusions of the study can be presented in a brief conclusions section, which can be a subsection of a section of discussion or results and appendices If there is more than an appendix, they should be identified as A, B, etc. The formulas and equations in the appendices must be given separate numbering: EQ. (A.1), EQ. (A.2), etc. In a subsequent appendix, EQ. (B.1) And so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc. Information on the essential title page $\hat{A} \hat{e} \hat{a}, \sim \hat{a} \hat{a} \hat{e}$ title. Concyced and informative. Securities are often used in information recovery systems. Avoid abbreviations and formulas where possible. They are not the names of the author and affiliations. Please clearly indicate the name (s) name / name (s) of each author and verify that all names are carefully written. You can add your name in brackets into your script behind English transliteration. It has the authors' affiliate addresses (where the actual work has been done) under the names. Indicate all affiliations with a tiny superscript letter immediately after the author's name and in front of the appropriate address. Provide the entire postal address of each affiliation, including the name of the country and, if available, the e-mail address of each author. Correspondent author. Clearly indicate those who manage correspondence in all phases of the referee and publication, also post-publication. This responsibility includes the answer of any future demand on methodology and materials. Make sure the e-mail address is provided and the contact details are updated by the corresponding author. Present / permanent address. If an author has been moved as the work described in the article has been done, or was visiting at the moment, a "current address" (or "permanent address") can be referred to as a more page known Name of this author. The address in which the author actually has work must be maintained as the main affiliation address. SuperScript Arabic numerals are used for such more page notes. The highlights of the salient points are optional but highly encouraged for this diary, as they increase the discovery of your article through search engines. They consist of a short collection of list points that capture the new results of your search and new methods used during the study (if present). Take a look at the examples here: Example Highlights.Highlights must be sent to a separate editable file in the online sending system. Use "Highlights" in the file name and include 3 to 5 points in list (maximum 85 characters, including spaces, by list point). Abstract a concise and factual abstract is required. The abstract should briefly declare the purpose of research, the main results and the main conclusions. An abstract is often presented separately from the article, so it must be able to be alone. For this reason, references should be avoided, but if essential, then mention the author (s) and the year (i). Furthermore, non-standard or non-common abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Keywords immediately after the abstract, they provide a maximum of 6 keywords, using American spelling and avoiding General and plural and more concepts (avoid, for example, "and", "or"). Save with abbreviations: only the abbreviations established firmly in the field can be eligible. These keywords will be used for indexing purposes. The abbreviations define the abbreviations that are not standard in this field in a more page known to place on the first page of the article. Such abbreviations that are are In apber must be defined at their first mention there, as well as in the most page note. Guarantee the consistency of abbreviations throughout the article. Thanks Collar The awards in a separate section at the end of the article before references and not, therefore, including them on the title page, as a higher title page note or otherwise. List those individuals who have provided help during the search here (for example, providing linguistic help, write assistance or test by reading the article, etc.). Formatting sources of financing List of funding sources in this standard way to facilitate compliance with the requirements of the lender: financing: this work was supported by the National Institutes of Health [XXXX grant numbers, Yyyy]; The Bill & Melinda Gates Foundation, Seattle, WA [Grant Number ZZZZ]; And the United States Peace Institutes [Grant AAAA number]. It is not necessary to include detailed descriptions of the program or type of subsidies and prizes. When funding come from a block subsidy or other resources available for a university institution, college or other research institute, send the name of the institute or organization that provided the financing. If no financing has been provided for research, please include the following sentence: this research has not received any specific subsidy from the financing agencies in the public, commercial or non-profit sectors. Unit Following rules and conventions accepted internationally: use the international unit system (Yes) If other units are mentioned, please provide their equivalent in Yes. Mathematics formulas Please send mathematics equations as editable text and not as images. Present simple formulas in line with the normal text, where possible and use the solids (/) instead of a horizontal line for small fractional terms, for example, x / y. In principle, the variables must be presented in italics. The powers of and are often more conveniently indicated by the ESP. Number of any equations that need to be displayed separately from the text (if referred to explicitly in the text). PAGE PAGE NOTES The most page known should be used sparingly. Number them consecutively throughout the article. Many word processors build more page notes in the text and this function can be used. If this should not be the case, indicate the position of the more page notes in the text and present the most page notes separately at the end of the article. Artwork Artwork Electronic General Points $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Make sure you use uniform lettering and sizing your original works of art. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Favored fonts: Arial (or Helvetica), Times New Roman (or Times), Symbol, Courier. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e number The illustrations based on their sequence in the text. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Use a logical denomination convention for works of artwork. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Indicate by figure if it is a single mounting image, 1.5 or 2 columns. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Only for requests for words, you may still provide figures and captions and tables within a single file in the revision phase. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e Please note that individual figure files larger than 10 MB must be supplied in separate source files. A detailed guide on electronic art work is available. Exhales to visit this site: Here are some extracts from detailed information. Formats regardless of the application used, when your electronic art work is aimed, please 'Save as' or convert images into one of the following formats (note the resolution requirements for line drawings, halftone and line combinations / Halftone supplied below). EPS (or PDF): Vector drawings. Incorporate the Or save the text as 'graphics'. TIFF (or JPG): Color or grayscale photographs (halftone): Always use a minimum of 300 dpi. TIFF (or JPG): Bitmapped line drawings: use a minimum of 1000 dpi. TIFF (or JPG): Bitmapped Line / Half-Tone (Color or Grayscale) combinations: a minimum of 500 dpi is required. Please do not: $\hat{A} \hat{e} \hat{a}, \sim \hat{e}$ provide optimized files for the use of the screen (for example, GIF, BMP, PICT, WPG). The resolution is too low. $\hat{A} \hat{e} \hat{a}, \sim \hat{a}$ e provide too low files in the resolution. $\hat{A} \hat{e} \hat{a}, \sim \hat{e}$ Send graphics disproportionately for the content. content. Artworks Make sure that the artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF) or MS Office files) and with the correct resolution. If, along with your accepted article, you will send usable color figures, then Elsevier will guarantee, at no additional cost, that these figures will appear in online color (for example, scientedrect and other sites) in addition to the reproduction of the color in print. Further information on the preparation of electronic works of art. The figure hods ensure that each illustration has a caption. A caption should include a brief title (not on the figure itself) and a description of the illustration. Keep the text in the illustrations yourself, but explains all the symbols and abbreviations used. Tables Please send tables as editable text and not as images. The tables can be positioned next to the relevant text in the article or on separate pages at the end. Numerical tables consecutively in accordance with their appearance in the text and place all the table notes under the body of the table. Save money in the use of tables and make sure that the data presented in them do not duplicate the results described elsewhere in the article. Please avoid the use of vertical rules and shading in the table cells. Citation references in Text Make sure that any reference mentioned in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be administered in full. Unpublished results and personal communications are not recommended in the reference list, but can be mentioned in the text. If these references are included in the reference list, they should follow the standard reference style of the diary and should include a replacement of the publication date with "unpublished results" or "personal communication". The quotation of a reference as "in print" implies that the item has been accepted for publication. Reference links increased by the detectability of the high quality peer research and revision are guaranteed by online links to the aforementioned sources. To allow us to create links to abstraction and index services, such as Scopus, Crossref and PubMed, make sure that the data provided in the references are correct. Please note that incorrect surnames, magazine / book titles, publication year and paging can prevent connection creation. When copying the references, please pay attention as it may already contain errors. The use of doi is highly encouraged. A doi is guaranteed to never change, so you can use it as a permanent connection to any electronic item. An example of quote that uses doi for an item not yet in question is: Vandecar J.C., Russian R.M., James D.E., Ambeh W.B., Franke M. (2003). Assismic continuation of the Breens Antilles slab under North-Eastern Venezuela. Geofisic research newspaper, . Please note that the format of these quotes should be in the same style as all other references in the paper. Web references as a minimum, the complete URL should be provided and the date on which the reference has been reached last time. Any further information, if notes (doi, author names, dates, reference to a publication of origin, etc.) should be provided. Web references can be listed separately (for example, after the reference list) in a different header, if desired, or can be included in the reference list. Data references This newspaper encourages you to mention the set of data below or relevant in the manuscript indicate to us in the text and including a reference to the data in the reference list. THE Data should include the following elements: name (i) author, data set title, data repository, version (where available), year and global persistent identifier. Add [Dataset] immediately before reference so that it can be identified correctly as a reference to the data. The [Dataset] identifier will not be displayed in your published article. References in a special issue Make sure that the words "this problem" are added to any reference in the list (and any quotes in the text) to another to the other In the same special number. Reference management software Most Elsevier magazines have their reference model available in many of the most popular product of reference management software. These include all products that support quote-style language styles, such as Mendeley. Using plug-in quote from these products, the authors only need to select the appropriate official model when preparing their article, after which quotes and bibliographies will be automatically formatted in the style of the magazine. If no model is still available for this magazine, please follow the format of the references of samples and quotes as shown in this guide. If you use the reference management software, make sure you remove all field codes before sending the electronic manuscript. More information on how to remove field codes from different reference management software. Mendeley Desktop users can easily install the reference style for this magazine by clicking on the following link: http://open.mendeley.com/use-cciationd-style/materials-science-in-semiconductor-processingwhen Prepare your manuscript, It will therefore be able to select this style using plug-ins for Microsoft Word Mendeley or LibreOffice. Formatting Reference There are no rigorous requirements on the submission reference. References can be in any style or size until the style is consistent. Where applicable, author (s) name (i), magazine title / title of the book, title title / title of article, publication year, volume number / book Chapter and the article number or article number They must be present. The use of doi is highly encouraged. The reference style used by the magazine will be applied to the article accepted by Elsevier during the test phase. Note that the missing data will be highlighted during the proof for the author of correct. If you do it desire to format the references alone should be organized according to the following examples: Text reference style: Indicate references by number (s) in square brackets, in line with the text. The actual authors can be indicated, but must always indicate the reference number (s). Example: '..... as demonstrated [3.6]. Barnaby and Jones [8] have achieved a different result 'List: number The references (numbers between square brackets) in the list in the order in which they appear in the text. Examples: Reference to a magazine publication: [11]. van der Geer, J.a.j. Hanraads, R.A. Lupton, the art of writing a scientific article. J. Ski. Municipality. 163 (2010) 51a 59. to an official publication, with an article number: [21]. van der Geer, J.a.j. Hanraads, R.A. Lupton, 2018. The art of writing a scientific article. Hellyon. 19, E00205, to a book. [3] W. Strunk Jr., E.B. White, The Elements of Style, Quarta Ed. Longman, New York, 2000. The reference to a chapter in a well-kept book: [4] G.R. METTAM, L.B. Adams, how to prepare an electronic version of your article, in: B.S. Jones, R.Z. Smith (Eds.), Introduction to Electronic Age, E- Publishing Inc., New York, 2009, PP 281a 304.Reference to a website.: [5] Cancer Research UK, Cancer Statistical Reports for the United Kingdom, 2003 (accessible 13 March 2003). Reference to a set of data: [Dataset] [6] M. OGURO, S. IMAHIRO, S. Saito, T. Nakashizuka, mortality data for Japanese oak disease and surrounding Forestry compositions, Mendeley Data, V1, 2015, to software: [7] E. Coon, M. Berndt, A. Jan, D. Svyatsky, A. Atchley, E. Kikinzon, D. G. Manzini, E. Shelef, K. Lipnikov, R. Garmella, C. Xu, D. Moulton, S. Karra, S. painter, E. Jafarov, S. Molins, Advanced Terrestrial Simulator (ATS) V0.88 (Version 0.88), Zeno, 25 March 2020 . Journal SIGNE Source official names must be shortened according to the title list of Word Abbreviations. Video Elsevier Elsevier Materials and video animation of sequences to support and improve your scientific research. The authors who have video or animation files that they intend to present their article are strongly encouraged to include links to these within the article of the article. This can be done in the same way as a figure or table by referring to the video content or animations and detecting in the body of the text in which it must be placed. All sent files must be adequately labeled so that directly relate to the contents of the video file. In order to ensure that your video or animation material is directly usable, please provide the file in one of the recommended file formats with a maximum preferred size of 150th. MB for files, 1â, GB in total. The video and animation files provided will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'ALMBICCHI' with files: You can choose any frame from video or animation or make a separate image. These will be used instead of standard icons and will be customized to link to video data. For more detailed instructions visit the video instruction pages. Note: Since video and animation cannot be incorporated into the printed version of the magazine, please provide text both for electronics and print preview for the portions of the artifact that refer to this content. Data display includes interactive data views in the publication and let our readers interact and engage more closely with your search. Follow the instructions here to find out the display options of available data and how to include them with your item. Additional additional using the following format: Database: XXXX (for example, Tair: AT1G01020; CCDC : 734.053; PDB: 1xFN). Mendeley Data This magazine supports Mendeley data, allowing you to deposit all the search data (including raw and processed data, video, code, software, algorithms, protocols and methods) associated with your manuscript in a free-to-use accessory access open. During the presentation process, after loading your manuscript, you will have the possibility of loading the data sets relevant directly to Mendeley Data. DataSets will be listed and directly accessible to readers next to your article published online.For More information, visit Mendeley data for magazines page. Declaration of data to promote transparency. We encourage you to declare the availability of data in your presentation. This could be a requirement of your body or financing institution. If the data is not available for access or unsuitable to the mail, you will have the possibility to indicate why during the sending process, for example by stating that the search data is confidential. The statement will appear with your article published in Sciencedirect. For more information, visit the Data Statement page. Online correction The test to guarantee a rapid publication process of this article, we ask you for authors to provide us with their test corrections within two days. The corresponding authors will receive an e-mail with a link to our online proofing system, allowing the annotation and correction of online tests. The environment is similar to MS Word: in addition to editing text, it is also possible to comment on the figures / tables and respond to the editor's questions. Web-based proofing provides a lesser process than faster errors and allowing you to directly type the corrections, eliminating the potential introduction of errors.If preferred, you can still choose to annotate and upload the modifications of the PDF version. All test insenctions will be provided in the e-mail we send to the authors, including alternative methods to the online site and PDF.We will do everything possible to get your article published quickly and precisely. Please use this test only to control the composition, editing, completeness and correctness of the text, tables and figures. Significant changes for the article As accepted for publication will be taken into consideration only at this stage with the editor permission. It is important to make sure that all corrections are sent to us in a communication. Please check carefully before answering, as the insertion of some successive corrections cannot be guaranteed. Boat correction is exclusive responsibility. Extracts the corresponding author will be, at no cost, they will receive a custom Share Link by providing 50 days free access to the published final version of the article on Sciencedirect. Share Link can be used to share the article through any communication channel, including e-mail and social media. For a fee, paper extracts can be ordered via the extract order form that is sent once the item is accepted for publication. Both the corresponding and co-authors can order extracts at any time via the Elsevier Author Services. Corresponding authors who have published their gold article Open Access does not receive a link quota as their final published version of this article is available open access to scienceDirect and can be shared The DOI article link. Visit the Elsevier service center to find the answers you are looking for. Here you will find everything from frequently asked questions to enter Touch.You can also check the status of your article presented or find out if your item accepted will be published. Published.
